Injury and Illness Prevention Program
Safety, Health and Environmental Policy Statement

We have developed a comprehensive injury and illness prevention program that addresses our specific safety concerns and provides guidance for the performance of our individual job tasks within the framework of appropriate OSHA standards.

Safety takes a commitment from all personnel within our organization. Training will be interactive with an opportunity for all to actively participate, ask questions, make suggestions, and refer to our written policies and procedures.

It is our policy to provide a work environment that is inherently safe. The safety and health of our employees is of primary importance as they are our most important resource. Our goal is an accident free workplace with zero accidents and occupational diseases.

Safety training needs will be identified by continual reassessment of our work methods, equipment and job sites as well as employee and management input. Observation of unsafe acts will be addressed immediately.

Each employee is encouraged to contact their Supervisor immediately should a safety or health risk exist so that corrective action may be taken immediately.

All employees are expected to perform all duties in a safe manner and in compliance with our written procedures as well as applicable local, state, and federal standards.

We are committed to preservation of our environment and will, to the best of our ability, prevent pollution, limit energy consumption, reduce waste, properly dispose of waste in a responsible manner and in compliance with local, state, and federal laws, use chemical products that are not harmful to the environment, use recycled products when possible, keep our employees informed of environmental issues, and, when possible, involve our suppliers and contractors with whom we work, in environmental awareness.

This Policy Statement will be conspicuously posted.

Patrick Evje
Safety Director
